Our Infrastructure ABOUT US

RKPVC, We are the pioneer in interior decorating with a range of options for home decorations to once spaces .

Our panels are easy to install, low maintenance, waterproof and works well in difficult conditions and terrains. PVC wall panels are completely hassle free and upgrades the look completely. This interior wall paneling trend has replaced other wall finishes such as wallpaper, tiles cladding, and paint. The **PVC Wall Panels** is the most popular wall panel. They can be used to improve the appearance of your interiors, as well as the floor and furnishings.

Today, PVC panels have become a strong pillar in the construction industry that replaces wood in exterior applications.

The polyvinyl chloride panels are available in different thicknesses and shades, making them popular for decorating walls. In addition, the surface coating of a PVC is either solid or mesh, which makes it a perfect choice for usage.

PRODUCTS

We're Passionate to Giving Our Customers
The Best Helping Hands To Fulfill Their Dreams.

- PVC PANELS
- UV MARBLE SHEETS
- CHARCOAL LOUVERS
- DIGITAL MARBLE SHEETS
- HD & 3D SHEETS
- FRENCH MOULDING
- W.P.C. DOOR FRAME
- W.P.C. IMP LOUVERS
- FLUTED LOUVERS

A few areas to install PVC Panels include:

- Window & Door Surrounds
- Fascia & Soffit Trim
- Deck Skirting
- Architectural Mouldings
- Column & Post Wraps
- Porch Ceilings
- Groove Wall Panelling
- Corner Boards

Coming to the residential application, the PVC Wall Paneling turns out to be a suitable choice for the following spaces:

- Bedroom
- Living Room
- Kitchen
- Office
- Lobby, and
- Most importantly, the Roofs

Advantages of PVC Wall Panels :

- PVC wall panels can be very useful when there is dampness in a wall. It can resist moisture very well.
- PVC is an environment-friendly material. Much medical equipment and food packaging are made from it because they do not cause any harm to the environment. This makes it useful for schools, hospitals, and sports arenas.
- PVC is very resistant to moisture. It is free from cracks and pores, which prevents bacteria growth. The boards have a layer of polyurethane that gives them a smooth, plain surface. These boards are easy to clean. It is easy to clean the wall paneling because there is no dirt on it. These panels can be used in kitchens and bathrooms, as well as other rooms.
- When used on exterior surfaces of the house, they don't rust.
- They burn slowly because their ignition temperature is 60 C. They emit less smoke than wood, and they are less toxic in the natural environment.
- Because these panels are lightweight, the installation time is very short. These panels are easy to cut and install without the need for grout.
- The interlocking tongue and groove system allows for the fast fixing of many panels. This allows you to easily replace one panel if it becomes damaged.
- Insulating with PVC panels is easy.
- PVC panels can be recycled and old ones can be given to a recycling facility.
- PVC panels come in many different colors and designs. Designers have many options when it comes to creating a wall decoration.
- PVC panels have a finished surface. These panels do not require any additional finishing, such as painting or polishing.

The background is a solid dark navy blue. It features two sets of thin, light-colored wavy lines that flow from the top corners towards the bottom, creating a sense of movement. A single, thin, light-colored vertical line runs down the center of the page, passing through the middle of the word 'CEILING'.

The background is a solid black field. It is decorated with thin, light-colored lines. On the left and right sides, there are series of concentric, wavy lines that resemble topographical contours or ripples in water. In the center-right area, there is a grid of intersecting lines, creating a diamond or mesh-like pattern. A single, thin vertical line runs from the top to the bottom of the page, positioned slightly to the left of the center.

The background is a solid dark navy blue. It features several thin, light-colored lines. Two vertical lines, one on the left and one on the right, extend from the top to the bottom of the frame. Overlaid on these are numerous wavy, concentric lines that resemble topographical map contours or marble patterns, creating a sense of depth and movement. The text is centered in the middle of the image.

DIGITAL MARBLE SHEET

DIGITAL MARBLE DESIGNS

Digital marble design sheets refer to digitally created or simulated sheets that showcase various marble patterns and designs.

These sheets are typically used in the interior design and construction industries for planning and visualizing how marble surfaces will appear in a given space. Unlike traditional marble, which is a natural stone, digital marble design sheets are crafted using computer-generated graphics to replicate the intricate details and veining patterns found in real marble.
